PROFESSIONAL SUMMARY

Technical Product Manager with 13+ years spanning engineering, operations, and product leadership. Own roadmap and delivery for 31 microservices powering a 2M-user cryptocurrency exchange, leading a 20-engineer team at **95%+ on-time delivery**. Previously drove an 8x manufacturing scale-up (3K → 25K units/month) while cutting waste 26% and downtime 18%. Combines hands-on engineering fluency with rigorous product execution to ship complex systems at scale.

EXPERIENCE

Technical Product Manager

2 promotions in 6 months

Sep 2024 – Present

Kifpool.me — Cryptocurrency Exchange · FinTech

- Own end-to-end product roadmap and delivery across **31 microservices** (exchange engine, order management, pricing, blockchain integrations), sustaining **95%+ on-time delivery** for a **2M-user** platform
- Lead a **20-engineer cross-functional team** spanning backend, infrastructure, and blockchain squads; earned **2 promotions in under 6 months** (Developer → Scrum Master → TPM)
- Redesigned sprint execution from monolithic planning to service-level ownership, **cutting cross-team dependency blockers 30%** and improving release predictability
- Built and shipped an org-wide delivery tracking framework, giving C-suite **real-time visibility** into velocity, risk, and release confidence across all 31 services
- Translate executive strategy into sprint-level execution plans for a FinTech platform processing **~5,000 daily transactions** across trading, custody, and settlement

Production Manager

Feb 2019 – Sep 2024

Toosalem Industrial Company — Automotive Manufacturing

- Scaled production output **8×** (3,000 → 25,000 units/month) by designing a new production line, restructuring shift operations, and optimizing end-to-end throughput
- Drove **40% efficiency gain** across 3 shifts and ~80 personnel through process reengineering and cross-department coordination (Engineering, Foundry, HR, Supply Chain)
- Reduced material waste **26%** and unplanned downtime **18%** via data-driven root-cause analysis and preventive maintenance programs
- Built and deployed **2 internal software systems** (Packaging Management, Maintenance Management) serving 21 users, replacing manual tracking and improving KPI reporting accuracy

Co-Founder & Developer

2011

GoldenTech — Chikhoobe Platform · Startup

- Co-founded a data collection startup; designed and built the full-stack platform, led product ideation through early-stage validation and product-market fit discovery

SKILLS

Product & Leadership

Technical Product Management, Agile/Scrum, Cross-functional Team Leadership, Product Roadmapping, Sprint Planning & Delivery, Stakeholder Management, OKRs/KPIs, Product Analytics, User Research

Infrastructure & Data

Docker, Git (GitHub/GitLab), Redis, NATS, CI/CD Pipelines, PostgreSQL, MySQL, ClickHouse

Technical

Python (FastAPI, Django), PHP (Laravel), Go, Node.js, Microservices Architecture, REST API Design, Async Programming

Languages

English (Upper-Intermediate), Farsi (Native)

EDUCATION

Bachelor of Science, Industrial Management

Imam Reza International University · 2011 – 2015

Product Management Program

Bozhan School — Product Strategy, User Research, Product Development, Marketing & Analytics
